

MLRK1-VD22

(Formerly VLP22-UL-M KIT)

- **PATENT PENDING PUSH TO SET (PTS) TECHNOLOGY**
- **INCREDIBLY EASY TO INSTALL**
- **LOW ENERGY MOTOR DRIVE**
- **UL LISTED**
- **3 YEAR NO HASSLE WARRANTY**

The new MLRK1-VD22 is a practical and cost-effective way to convert a mechanical Von Duprin 22 series device to an electrified latch pullback device. The retrofit kit will maintain all UL listings on the device and is backed by CAT's 3-year no hassle warranty. It easily hooks into the dogging tail piece and is secured with (2) screws, in a matter of seconds. The only hole you'll need to drill is for the wire raceway. Push to Set (PTS) allows for an easy post-installation adjustment of the latch/latches. A built-in REX switch on all units! Last but not least, the Kit features our updated MM5 module, energy conscious while still being capable of getting the tough jobs done!
